

David T Rowe-Rowe, Pietermaritzburg, South Africa. MSc (biology and behaviour of S African otters and mustelines); PhD (mammal ecology of the Drakensberg). Worked as a wildlife biologist for Natal Parks Board, South Africa for 30 years. Research done on freshwater fishes, carnivores (mainly otters, mustelines, water mongoose, and jackals), montane antelopes, montane small mammals (rodents and shrews), and use of fire in grassland management; as well as on alien house mice on sub-Antarctic islands. Monitored the distribution and status of all mammals in the province of KwaZulu-Natal, with more detailed studies on carnivores and ungulates. Served as OSG co-ordinator for Africa from 1974 until 1996, monitoring distribution, status, threats, and legal protection of sub-Saharan otters.
